I've just had to recover my profiles from a back copy because Chrome data got corrupted and I didn't get them back until I restored the upper level folder, that is, ...

Is C:\Users\MyUser\AppData\Local\Programs the folder where installers install programs for a single user only? Applications installed to %LocalAppData% would only be available to the user ...

3 User profiles are stored in User Data Directory and it vary depending on the operating system. The easiest way is to navigate to chrome://version and look for the Profile Path field. Example (Windows): ...

The question is quite straight forward, I need a list of environment variables (which is a fixed list) and is answered by Dennis Williamson.

7 The AppDataLocal and AppDataRoaming locations are the preferred locations for applications to store data that is not required to be exposed to the user. In a domain environment, the Roaming is ...

Why are there directories called Local, LocalLow, and Roaming under Users\<username>\AppData? Ask Question Asked 16 years, 6 months ago Modified 5 years, 7 months ago

C:\Users\fg\AppData\Local\Microsoft\Windows\Apps But when I open an explorer window (e.g. the trash), click on the right of the path to select it, then replace it by typing cmd &lt;enter>; then ...

The second problem is I'm almost certain %AppData% contains hardlinks, and if it does, it's why it's not intended to ever be moved, since doing so would break those hardlinks, resulting in a ...

23 The original User's Profile directory lives in a directory like C:\Users\username\AppData. How can I refer to the current user's profile directory when using the Windows command line? By searching I ...

In AppData however, the user always have rights to write there, even if they are not administrators. So a

## 24V inverter to 220V self-operated

program that needs to write data, for example a webbrowser with its cache will ...
