Berkeley Lab collects, cleans, and publishes project-level data on distributed* solar and distributed solar+storage systems in the United States. The data are ...

Whether you're considering residential solar panels for your home or exploring large-scale renewable energy solutions, the lessons learned from these mega projects demonstrate the ...

In Q3 2025, the residential segment installed 1,088 MWdc of solar capacity, declining 4% year-over-year and quarter-over-quarter. Despite an industry rush to bring projects online this year to ...

Here we provide a global inventory of commercial-, industrial- and utility-scale PV installations (that is, PV generating stations in excess of 10 kilowatts nameplate capacity) by using a...

Miles-long rows of solar panels humming under the desert sun, powering whole regions. This list cuts through the noise, ambitious ...

China is using the high-altitude expanse for immense solar panel farms and wind turbines and has begun work on the world's largest hydroelectric ...

From 2016 to 2022, PV has seen an annual capacity and production growth rate of around 26%, doubling approximately every three years.

CAL DOGE has claimed nearly \$1 billion was taken from a California solar panel program and funneled into Democratic voter registration and activism. The report, out Thursday, argues \$928 ...

Tandem PV, a company working on perovskite-silicon panels, was awarded a \$4 million grant by the California Energy Commission to fund third-party validation and durability testing.

To produce 1 GWh of solar power, you need approximately 2.8 acres of land--or roughly 11.2 million acres

4 million photovoltaic panels

(17,500 square miles) to generate 4 million GWh of ...
