Harnessing the power of the sun, Noor Energy 1 delivers round-the-clock clean energy through advanced CSP and PV technology, ensuring a sustainable and carbon-free future for Dubai.

While being a major oil producing country, the United Arab Emirates (UAE) has taken steps to introduce solar power on a large scale. However, solar power still accounts for a small share of energy production in the country. The country was the 6th top carbon dioxide emitter per capita in the world in 2009, with 40.31 tonnes, but is planning to generate half of its electrical energy by 2050 from solar and nuclear sources, targetin...

The hydrocarbon-rich Gulf states are located in the heart of the global sunbelt which endows them with some of the highest solar resources in the world. Peak load hours in these ...

By flooding markets with cheap and low-carbon LNG at massive scale, the Arab world makes gas the future and pushes solar to the margins worldwide.

As part of Dubai Clean Energy Strategy to generate 75 per cent of Dubai's power from clean energy by 2050, Dubai will build the largest Concentrated Solar Power (CSP) project on a single site in the ...

At Arab Energies Solar, we believe in the power of renewable energy to create a more sustainable future. With a passion for clean energy and a commitment to our customers, we are dedicated to ...

A research team from Khalifa University in the United Arab Emirates and Columbia University in the United States has analyzed the reasons that ...

As the UAE was revealing its new solar project, Saudi Aramco, the world's largest oil company, announced a joint venture that would start ...

Arabian Power has the experience to install all types of Solar PV systems on carports, rooftops or on the

Arab Solar Power

ground. Since 2017, Arabian Power has completed ...

By harnessing its solar potential, the region can ensure long-term energy security, environmental sustainability, and economic diversification. The Arab Gulf states are uniquely ...
