A new United Nations special report highlights how far the world has come in renewable energy since the Paris Agreement on Climate Change in ...

Renewables supplied 5,072 TWh of electricity in the first half of 2025 - up from 4,709 TWh a year earlier. Coal, by comparison, generated 4,896 ...

Renewable energy overtook coal as the world's leading source of electricity in the first half of this year - a historic first, according to new data from ...

Renewable Energy GenerationRenewables in The ElectricitymixHydropowerWind EnergySolar EnergyBiofuelsGeothermalHow much of our electricity comes from renewables?In the sections above we looked at the role of renewables in the total energymix. This includes not only electricity but also transport and heating. Electricity forms only one component of energy consumption. Since transport and heating tend to be harder to decarbonize - they are more reliant on oil and gas - r...See more on ourworldindata U.S. Energy Information Administration (EIA)Renewable energy explained - U.S. Energy Information Administration ...Hydropower and wood were the most used renewable energy resources until the 1990s. Since then, U.S. energy consumption from biofuels, geothermal energy, solar energy, and wind energy have ...

Worldwide solar and wind power generation has outpaced electricity demand this year, and for the first time on record, renewable energies combined generated ...

Data on renewable power capacity represents the maximum net generating capacity of power plants and other installations that use renewable energy sources to produce electricity.

Our nation has abundant solar, water, wind, and geothermal energy resources, and many U.S. companies are developing, manufacturing, and installing cutting edge, high-tech renewable energy ...

At the moment renewable energy resources generate

Solar PV is today the only renewable energy technology on track with the Net Zero Emissions by 2050 (NZE) Scenario. Wind, hydro, geothermal, solar thermal and ...

Renewable energy contributed 34.3% of all global electricity generated in the first half of 2025, while coal fell to 33.1%, the energy think tank ...
