---

As a member of the Helmholtz Association with almost 7,600 employees, we conduct research into options for a digitalized society, a climate-friendly energy system, and a resource-efficient economy.

Department of Electrochemical Energy Storage is a German research institution in Berlin. Further information can be found in GERiT, a DFG service.

Growing demand for energy-dense and safe batteries drives research towards all-solid-state lithium (Li) batteries.

We are dedicated to researching the field of electrochemical energy storage; an approach that paves the way for compact, highly efficient storage devices for decentralized supply systems and sustainable ...

Researchers at the Federal Institute for Materials Research and Testing (BAM) have developed an innovative approach to make solid-state batteries more powerful and suitable for ...

The Huijue Group Off-Grid Solution comprises three main components: photovoltaic systems, energy storage systems, and off-grid systems, enabling energy self-sufficiency.

Highjoule provides a wide variety of energy storage products, such as industrial and commercial BESS, home energy storage systems, photovoltaic modules, and ...

Forschungsdienstleistungen Berlin, BE 185 Follower:innen Info The research work in the Colloidal Chemistry Group at HZB led by Prof. Dr. Yan Lu mainly focuses on the design and fabrication of ...

Established in 2005, Highjoule (HJ Group) is a leading and professional Energy Storage Company in China, dedicated to delivering intelligent, high-efficiency, and sustainable power solutions for ...
