Grid connection queues in Brazil are offering new opportunities for energy storage and hybrid systems and opening new energy business models. Renewable energy companies are adding ...

While it already has a relatively high share of renewable energy in its energy mix, Brazil is taking further steps to collaborate with global energy transition efforts.

Brazilian energy storage company UCB and the US-based Powin have signed a strategic partnership relating to energy storage in Brazil, with a focus on 30 MW-plus, utility-scale projects.

Installed storage capacity in Brazil tripled between 2023 and 2024, according to energy consultancy Greener, although it remains below 1 GWh. ...

Modular containers can be transported to locations with higher energy demand. The system avoids the construction of new transmission lines, helping to reduce environmental impact.

The project is designed to provide reliable energy to the national grid in Brazil, supplying much-needed additional capacity to back the existing ...

The Brazilian National Electric Energy Agency (ANEEL) is entering a new phase of dialogue on energy storage regulation. On December 10, 2024, ANEEL presented the results of the ...

According to PDE 20341, the need for additional supply to meet the power requirement begins in 2027, reaching the order of 5.5 GW in 2028 and reaching more than 36 GW in 2034.

Explore Brazil's battery energy storage systems, focusing on current regulations, investment opportunities, and the role of these systems in the energy transition.

Brazil energy storage container communication power plant operates

Construction of energy storage container power station in Brazil ISA CTEEP, a leader in Brazil's power transmission sector, has just energized the first large-scale battery energy storage project in the ...
