Recognising the potential contribution of energy communities in achieving a more secure, affordable and cleaner energy system for Europe, the ...

Based on more than 100 stakeholder interviews, the research exposes a troubling paradox. Florida suffers from frequent hurricanes, tropical storms, and flash floods, but a utility structure ...

Because our project focuses on evaluating inverter control strategies on the stability of microgrids toward 100% renewable penetration, only one microgrid is sufficient for our study.

From Business to Energy: Stanislas shares how his curiosity about renewable energy and community microgrids led him from a career in accounting to becoming a key player in community energy, ...

This paper investigates the effectiveness of a Reinforcement Learning agent, based on the Proximal Policy Optimisation (PPO) algorithm, for energy management across three different ...

Keywords WILLINGNESS TO PAY (WTP) DISCRETE CHOICE EXPERIMENT MIXED LOGIT MODEL MICROGRIDS RESILIENCE ELECTRICITY

This study considers the measured real meteorological data, grid kWh/EUR prices, grid access capacity and load profile belonging to the aggregated consumption of the more than 70 ...

CIRED is where the electricity distribution community meets and learns.

From Business to Energy: Stanislas shares how his curiosity about renewable energy and community microgrids led him from a career in accounting to becoming a key player in community ...

Abstract: Community Microgrid offers effective energy harvesting from distributed energy resources and efficient energy consumption by employing an energy management system (EMS).
