So there is a lot of uncertainty in the Chinese solar industry, but there are also irrefutable facts: China needs to continue to expand ...

Aden Group's Aden Energies joined industry experts in China's energy sector to set standards for monitoring and controlling solar power installations.

On December 23, 2025, the National Development and Reform Commission and the National Energy Administration jointly issued the Opinions on Promoting the Large-Scale Development ...

OverviewHistorySolar resourcesSolar photovoltaicsConcentrated solar powerSolar water heatingEffects on the global solar power industryGovernment incentivesChina is the largest market in the world for both photovoltaics (PV) and solar thermal energy. Its PV capacity crossed 1,000 gigawatt (one terawatt, 1 TW) in May 2025. By June 2025, China's PV capacity surpassed 1,100 gigawatt. In 2024, China added 277 gigawatts (GW) of solar power, which was equivalent to 15% of the world's total cumulative installed solar capacity.

Alongside wind and solar, the country will orderly advance major hydropower projects, actively and safely develop nuclear power, ...

This review further proposes a strategic roadmap for sustainable development, emphasizing the integrated deployment of wind and solar as the dominant sources of power generation.

Depending on solar concentration modes, commercially applied CSP systems can be classified into four main types, namely, solar tower systems, parabolic trough CSP systems, linear ...

(GEM). The 339 GW of utility-scale solar and wind that have reached the construction stage accounts for one-third of all proposed ...

China Solar Power Generation Expert Group

China is expanding renewable energy exponentially while the U.S. is going backward. How China became the global leader, why the U.S. falling behind and what it ...

The report provides a comprehensive overview of PV market development, policy frameworks, industrial trends, and technological progress in China during 2024. In 2024, China added ...
