The Risti solar PV plant aligns with Estonia's national goal of achieving greater energy independence and sustainability. By combining solar, ...

Before the end of the strategy period, we plan to complete all environmental studies in the offshore wind farm area in the Gulf of Riga and obtain a building permit.

The decline in biofuels in 2025 is concerning, but the uplift in wind energy generation that same year, albeit modest, is encouraging. It is crucial for Estonia ...

Enefit Green is building Estonia's first wind-solar hybrid farm in Lääne-Rannarajooni Rural Municipality, between the villages of Vainu and Matka. The wind farm, with five wind turbines, and the solar farm, with ...

Estonia will receive EUR18 million to support two wind-based schemes. The largest is the EUR9.8 million Põhja-Eesti project, which combines solar and wind ...

On the International Wind Day, Enefit Green's Purtse wind and solar hybrid park, which is a unique renewable energy facility in Estonia, will be ...

The review comprehensively examines hybrid renewable energy systems that combine solar and wind energy technologies, focusing on their current challenges, opportunities, and policy ...

According to an Enefit Green press release, the hybrid plant, ...

In 2024, Estonian power plants produced 3,398 gigawatt-hours of electricity from renewable sources, which accounted for 63 per cent of Estonia's electricity production. For the first ...

Commissioned in October 2024, the Kirikme solar PV plant will be enhanced through the addition of a

Estonia Wind-Solar Hybrid Power Generation System Plant

55 MW / 250 MWh BESS, currently under construction since January 2026. WiSo Engineering is the ...
