-----

Vanadium flow battery casting tubes position Zurich as a leader in sustainable energy storage, offering scalable solutions for renewable integration and grid resilience.

The project combines utility-scale storage with an AI data center and district heating network in an ambitious multi-use development. The Swiss developer started building ...

Redox-flow batteries are considered to be one of the most promising solutions. The recruited fellows will develop materials (membranes, ...

Flexbase Group has begun building what could become one of Europe's largest flow battery storage installations, breaking ground on ...

Flexbase Group has broken ground on an 800 MW/1.6 GWh redox flow battery project in Laufenburg, Switzerland, in what could ...

FlexBase Group will start construction on a data centre plus 800MW/1,600MWh flow battery in Switzerland imminently, the firm claimed.

Our technology is designed, prototyped, and assembled locally - right here in our Thalwil facilities - and built for the needs of European industry. We deliver the simplest energy storage system ...

An excellent research environment at ETH Zurich, with access to state-of-the-art laboratory facilities. The opportunity to work on a project at the interface of synthetic chemistry and ...
