---

We developed a percentile-based yearly SAR image collection reduction and autoadaptive threshold algorithm in the Google Earth Engine platform to identify the spatiotemporal distribution of...

Find up-to-date statistics and facts on the global offshore wind energy industry.

The world's installed wind power capacity now meets well over 10% of global electricity demand - and much more than nuclear power. More than 30 countries now have a share of wind ...

GOWA members will collaborate to unpick key challenges to offshore wind, and proactively address blockers, such as financing for offshore wind in emerging markets and ...

In 2023, 25 new offshore wind farms with a total capacity of 9.8 gigawatts (GW) were taken into operation, increasing the global off-shore wind capacity to a total of 67.4 GW.

Our report finds that there is now already 83 GW of offshore wind installed worldwide, keeping the lights on for 73 million households, and powering countries' economic development. There is currently a ...

This dataset contains yearly electricity generation, capacity, emissions, import and demand data for over 200 geographies. You can find ...

The Global Offshore Wind Report 2025 by the Global Wind Energy Council (GWEC) provides a comprehensive overview of the offshore wind ...
