The expansion of solar and wind energy projects, including the rapid growth of offshore wind initiatives, is set to increase capacity by over 12GW by 2030. Additionally, efforts are underway to fully harness ...

In recent years, Greece has actively promoted photovoltaic technology, making it a significant driving force in the country's accelerated development of a new energy power system.

Greece's renewable energy sector is experiencing a rapid development. In the last five years, the share of renewables in the country's electricity mix grew by more than 15 percentage ...

Greece installed a record 2.572 GW of PV capacity in 2024, about 1 GW more than the previous year. In 2023, the country added 1.59 GW of PV capacity. The ...

Discover how Greece is rapidly expanding its clean energy sector with significant investments in solar and wind farms to achieve ambitious ...

Investors considering Greek solar and wind projects for 2025 and beyond will find a mature, well-supported market with substantial growth ...

Greece has overtaken the Netherlands to become Europe's solar PV leader, with 19% of its electricity coming directly from the sun in 2023, according ...

Solar PV now accounts for 17.4% of the country's power generation mix, with projections for 2028 estimating a total installed capacity of 12.57 GW. ...

The Seli Project entails the construction of a 309 MW photovoltaic unit with an integrated lithium-ion battery energy storage system. This project aims to optimise electricity generation and grid stability. ...
