The table below lists currently operational power stations. Some of these may have additional units under construction, but only current installed capacity is listed.

For example, the country announced plans to launch the world's biggest solar plant by 2027. The mammoth 8 GW installation will be ...

In this post, I delve into 10 compelling case studies from across South Asia, showcasing how countries like India, Pakistan, Bangladesh, Sri Lanka, ...

There is no one-size-fits-all approach to energy storage in Asia. Each country has its own unique requirements and opportunities. For example, ...

The newly signed South Asia Energy Storage Power Station Project aims to flip the script by deploying cutting-edge battery storage systems. But why should industries care?

This study provides a first-of-its-kind assessment of cost-effective opportunities for grid-scale energy storage deployment in South Asia both in the near term and the long term, including...

ES can complement variable renewables, but new investments in ES are not necessarily needed to integrate large amounts of renewable energy (e.g., GTG study for India).

Battery storage capability by countries, 2020 and 2026 - Chart and data by the International Energy Agency.

Scenarios for this study are designed to understand the drivers for energy storage investment and assess the potential role for energy storage on the South Asia power system.

To support the global transition to clean electricity, funding for the development of energy storage projects is
