The location and conditions of a site directly influence the ROI of your solar project. Using our satellite technology and weather models, you can access in-depth ...

Project Sunroof is a solar calculator from Google that helps you map your roof's solar savings potential. Learn more, get an estimate and connect with providers.

Committed to Restoring America's Energy Dominance.

Determine how much electricity could be generated from solar power in a city neighborhood. Your nonprofit organization recently launched a pilot program to ...

SEIA makes major solar project data available to the public through the map below. SEIA members have exclusive access to the list as a sortable, searchable MS Excel file that is updated ...

The U.S. Large-Scale Solar Photovoltaic Database provides the locations and array boundaries of U.S. photovoltaic facilities, with capacity of 1 megawatt or more.

Discover solar energy installations worldwide with our innovative Solar Panel Finder tool. Click anywhere on the global map to instantly search for ...

PVGIS24 solar panel calculator: Calculate energy potential with precise mapping. Interactive data and optimization for solar projects.

It is provided by the World Bank Group as a free service to governments, developers and the general public, and allows users to quickly obtain data and carry out a simple electricity output calculation for ...

The utility-scale data covers all operating solar farm phases with capacities of 1 megawatt (MW) or more and all announced, pre-construction, construction, and shelved projects with capacities greater than ...
