When I arrived at the wind turbine, I was already sweating. But it wasn't until I put on all the gear that I realized the physical and mental weight of what I was about ...

The wind workforce is growing rapidly; in 2023, wind had the second-highest employment numbers of any electricity generation sector -- 131,327 jobs, over twice as many as coal.

Ever wondered what it's like being inside a wind turbine? Get the inside scoop with our interview with a wind technician at one of our wind farms.

It is not unusual for the majority of workers in the wind energy sector, whether onshore or offshore, to work at height, climb ladders many times a day, work in confined spaces in awkward positions, ...

The country's first wind power plant is situated at Khurushkul in Cox's Bazar, the wind-based plant began commercial production on 8 March 2024. Photo: Syed Zakir Hossain While Bangladesh ...

Maintaining wind turbines is physically demanding and mentally stimulating, and many technicians find a deep sense of satisfaction in their work. Knowing they ...

After a short time working in a local university, I went to work for a wind turbine rotor blade plant. I soon became a quality control technician and worked there until it started layoffs and closed.

These wind turbines work according to a very simple principle, making the most of the wind's force, which in this case acts as a source of primary energy spinning its blades, it produces ...

Start in wind, but give yourself the ability to pivot. If you are in wind longer than a year without getting hours signed off on, you're betting against yourself and wasting your own time.
