---

Kenya Electricity Generating Company (KenGen) has been selected to carry out a battery storage pilot project, through a programme to increase ...

The BESS project has been identified as a possible solution to increased proportion of intermittent energy to the Kenyan power system and energy curtailment during off peak hours. The BESS project ...

As East Africa accelerates its transition to clean energy, the Kenya Mombasa Shared Energy Storage Power Station emerges as a critical solution for balancing grid stability and renewable integration.

To facilitate this, a pilot installation of the BESS capacity is being considered for several key regions, including Central Rift, Coastal Region, Mount Kenya, Nairobi, North Rift, and Western ...

East African country, Kenya, has launched its very first Battery Energy Storage System (BESS) to supply uninterrupted renewable power to its modular data center in the ...

KenGen's recent launch of a 1.16 MWh Battery Energy Storage System (BESS) in Nairobi came with all the typical trimmings of a milestone event.

The hybrid project dubbed "the Meru County Energy Park" will be a large-scale facility that combines wind, solar PV, and battery storage. On ...

The Kenya Electricity Generating Company PLC (KenGen) is to implement a Battery Energy Storage System (BESS) project as part of a World Bank funded programme. The BESS ...

Kenya is no stranger to innovation in energy. With the geothermal-rich Rift Valley, world-class wind corridors in Marsabit and a solar belt that ...
