Solar accounted for 58% of all new electricity-generating capacity added to the US grid through the third quarter of 2025, with more than 30 GW installed. Solar and storage, combined, ...

From California to New England, construction of solar energy is picking up speed, showing promise for hitting sustainability goals. In this article, ...

Global solar installations are on track for another record year. In the first six months of 2025, the world added 380 GW of new solar capacity -- 64% higher than during the same period in ...

Discover the world's biggest operational solar farms and the mega projects set to reshape tomorrow's renewable energy landscape.

Discover the world's largest solar farms in 2025. Complete rankings, capacity data, locations, and analysis of mega solar projects transforming global energy.

Join us at Solar Power World as we cover the world of solar news on technology, development and installation on a daily basis.

Developers added 12 gigawatts (GW) of new utility-scale solar electric generating capacity in the United States during the first half of 2025, and they plan to add another 21 GW in the ...

The US added 11.7 GW of solar in Q3 2025, pushing yearly totals past 30 GW, with most new installations happening in red states.

In 2024, between 554 GWdc and 602 GWdc of PV were added globally, bringing the cumulative installed capacity to 2.2 TWdc. China continued to dominate the global market, ...

Latest solar power news from Europe, Latin America, Sub-Saharan Africa, APAC, MENA and more. Stay

Latest progress of solar power stations

updated on solar PV, solar energy, policy & projects.
