This demonstration home by SoCalGas is a first of its kind, using solar, storage, an electrolyzer, and the Generac ARC microgrid controller to convert solar energy to hydrogen.

Develop a framework for dynamic formation of networked microgrids for optimized operations under both normal and emergency conditions. This project.

MSL organized and is coordinating a Long Duration Energy Storage Research and Demonstration Pilot Project focused on innovations in flow battery technology.

The Office of Electricity announces 14 projects selected through the Community Microgrid Assistance Partnership (C-MAP) to advance microgrid ...

Trina Solar has officially commissioned its integrated photovoltaic (PV)-storage-charging-discharging microgrid demonstration station at its ...

Seven EPIC-funded microgrid projects funded in 2015 recently concluded their three-year implementation timelines. These seven projects demonstrated low-carbon-based microgrids for ...

STAMP demonstrates a highly mobile, fuel-efficient tactical microgrid capable of powering dispersed operations, reducing generator reliance, and enhancing mission flexibility ...

A rural hospital in Washington State is building resilience one project at a time -- turning funding setbacks into a blueprint for community-scale energy ...

The work began in 2008 as a project to install a high-efficiency, 100% renewable energy-powered, single-building microgrid. Since then, the project has expanded into an installation-wide ...
