Using the digital real-time simulator capabilities within its Energy Systems Integration Facility, NLR is developing a hardware-in-the-loop test bed to simulate events and their impact on ...

High-fidelity platform for EMT simulation, SIL and HIL testing, ideal for validating control, protection, grid integration and large-scale stability across all stages of ...

The microgrid test bench is a ready-to-use configuration of control testing equipment for power electronics. It combines low-voltage experimental ...

Learn about ETAP Microgrid, an integrated solution used to efficiently evaluate and optimize microgrid systems. The solution enables simulation and hardware-in ...

Quickly configure microgrids, validate use cases and operational assumptions to generate high-confidence proposals and complete test plans for execution during field commissioning.

Test wide range of grid-tied products, low to high. Simultaneous AC and DC operation per phase AND automatic switching of outputs provides extensive flexibility. Embedded Real-Time Remote Control ...

Professional-grade simulation platform for designing, analyzing, and optimizing complex microgrid systems with renewable energy integration, energy storage, and smart grid technologies.

Test your power systems smarter with microgrid simulation, grid emulation, and inverter testing--real-time validation solutions designed by Impedyme.

Join us for an introduction and live demonstration of the new open source, commercially available platform spans from a low cost MyRIO Bidirectional Microgrid Inverter that enables students ...

This application is a simulation tool for microgrid systems. There are several components that can be

Microgrid Simulation Test Platform

configured and simulated, including generators, photovoltaic systems, energy storage systems, ...
