-----

This monumental increase, from just 300MW to at least 10GW, is the first time Vietnam has set a serious, actionable goal for energy storage. It's a ...

Led by Nhung Nguyen Hong from the Hanoi University of Science and Technology, the research introduces an optimal operational model for ...

First author's affiliation: School of Electrical and Electronic Engineering, Hanoi University of Science and Technology, Dai Co Viet 1, Hanoi, Vietnam

His research interests include power systems, electric vehicles, inverter-based resources, control theory, and optimization. Control Technique and Innovation Laboratory for Electric Vehicles, ...

Explore high voltage battery packs, wall mounted lithium batteries, and ESS cabinets from Hoenergy -- your 2025 Global Tier 1 Energy Storage Provider.

The Vietnam energy storage in microgrids market is characterized by rapid technological advancements and supportive government policies ...

As Vietnam seeks to enhance energy security and sustainability, this analysis explores the nuanced strategies and characteristics that set the country apart in the development and adoption of ...

Microgrid and energy storage project development A microgrid, regarded as one of the cornerstones of the future smart grid, uses distributed generations and information technology to create a widely ...

This paper studies the long-term energy management of a microgrid coordinating hybrid hydrogen-battery energy storage. We develop an approximate semi-empirical hydrogen storage ...
