Aramco has commissioned a world-first Iron-Vanadium (Fe/V) flow battery system to store renewable energy for its gas operations, marking a major milestone in industrial energy storage.

One of the important breakthroughs achieved by Skyllas-Kazacos and coworkers was the development of a number of processes to produce vanadium ...

Vanitec is a technical/scientific committee bringing together companies in the mining, processing, research and use of vanadium and vanadium-containing.

The new (Fe/V) flow battery commissioned by Aramco aligns with the company's focus on renewables investment and energy efficiency, as part of its ambition to achieve net-zero and ...

The Vanadium Redox Flow Battery (VRFB) has recently attracted considerable attention as a promising energy storage solution, known for its high efficiency, scalability, and long cycle life.

Elcora, a Canadian startup aiming to provide materials for the global battery value chain, is developing a vanadium pentoxide plant in Morocco to complement raw materials extraction in the ...

"Our vanadium flow batteries outlast lithium systems 3:1 in cycle tests," says Dr. Amina Belhaj, lead researcher at MASEN's Energy Lab. "They're basically the Tagine of batteries - slow-cooked ...

In an initiative that sets a benchmark in the energy industry, Aramco has activated at Wa'ad Al-Shamal (Saudi Arabia) the world's first Fe/V (iron-vanadium flow) battery system.

Aramco has commissioned the world's first megawatt-scale iron-vanadium flow battery to support gas production.
