---

The company is known for its expertise in designing and operating Solar PAR holographic mirrors and solar concentrators for applications requiring ...

Premier Resource Management (Bakersfield, CA), in partnership with the National Renewable Energy Laboratory, will develop a 100-kWe demonstration power plant with more than 12 ...

Antora uses renewable electricity to heat blocks of solid carbon--a low-cost, earth-abundant, and stable storage medium that's already used ...

Our storage technology in practice: off-grid solar power by Helia. We have developed a novel and cost-effective approach to the storage of thermal energy. ...

Global climate crisis encourages the use of renewable energy sources. Solar thermal, or concentrated solar power, technology is being rapidly adopted ...

Another promising way to store solar energy for electricity and heat production is a so-called molecular solar thermal system (MOST). With this approach a molecule is converted by photoisomerization into ...

The company has addressed these difficulties with its award-winning thermal energy storage and off-grid solar integration. Thermal energy storage uses ...

NETenergy is a thermal energy storage company that is creating a thermal battery designed to offset peak electricity load.

Operated by Sandia for the U.S. Department of Energy (DOE), the National Solar Thermal Test Facility (NSTTF) is the only large-scale concentrating solar power ...

# National Solar Thermal Storage Production Company

With funding provided by DOE under the National Laboratory R& D competitive funding opportunity, the NSTTF will maintain an operational facility that can be ...
