This article examines how BESS are revolutionizing energy markets by enabling widespread renewable energy integration, exploring market ...

Form Energy announces largest capacity energy storage system to date On 24th February, Google formally signed an agreement with Xcel Energy to deploy a 30GWh / 300MW, 100-hour iron ...

The US energy storage market is forecast to grow to 35 GW/70 GWh of new battery energy storage system (BESS) installations in 2026, up from 28 GW/57 GWh in 2025.

Around 315 GWh was installed across both grid-scale and behind-the-meter battery energy storage system (BESS) markets, representing nearly ...

Global battery energy storage systems, or BESS, rose 40 GW in 2023, nearly doubling the total increase in capacity observed in the previous year, according to a special report published ...

A new project, Tehuacana Creek 1 Solar and BESS, adding 837 megawatts (MW) in Texas, is the largest solar photovoltaic project expected to come online in 2026; it will also offer an ...

To further peer-learning under the Clean Energy Ministerial's Supercharging Battery Storage Initiative, this report showcases lessons learned and shares best practices for accelerating battery energy ...

The battery energy storage market continues its rapid growth, reshaping power systems worldwide. After a historic 2025, when global BESS capacity surpassed 250 GW and overtook ...

Utility scale battery storage capacity surpassed 26 GW in 2024 and continues to grow strongly, with BESS now forming a significant share of interconnection queues.

The report also notes that the US commissioned 11.9GW of battery energy storage system (BESS) capacity

New energy storage capacity BESS

last year, a 55% increase from the ...
