A review by the SUN DAY Campaign of data just released by the US Energy Information Administration (EIA) reveals that the mix of renewable energy sources provided nearly 26% of US ...

Is solar power going to take over the world? The past few years have seen a frankly astounding acceleration in the rate of its ...

Solar continues to dominate new electricity generation capacity added to the grid in the United States, according to the Energy Information ...

On the good side, solar continued its run of astonishing growth, generating 35 percent more power than a year earlier and surpassing hydroelectric power for the first time.

We expect the combined share of generation from solar power and wind power to rise from about 18% in 2025 to about 21% in 2027. In our STEO forecast, utility-scale solar is the...

Solar accounted for 58% of all new electricity-generating capacity added to the US grid through the third quarter of 2025, with more than 30 GW installed. Solar and storage, combined, ...

Solar Energy Information. Read the latest news and techniques for efficient solar photovoltaic power, new solar energy systems and more.

Newly published data from the Federal Energy Regulatory Commission (FERC), reviewed by the SUN DAY Campaign, reveal that solar ...

There are two main types of solar energy technologies--photovoltaics (PV) and concentrating solar-thermal power (CSP). On this page you'll find resources to learn what solar ...

Almost 70 gigawatts (GW) of new solar generating capacity projects are scheduled to come online in 2026 and

New solar power generation information

2027, which represents a 49% increase in U.S. solar operating capacity ...
