The paper reviews energy storage technologies and their applicability to the Australian National Electricity Market (NEM). The increasing dynamic variability between maximum and ...

A record five large-scale renewable energy generation projects totalling 1.2 GW of capacity reached financial close across Australia in the last quarter but industry figures say more ...

Solar PV installations The second half of 2025 saw 139,080 rooftop PV units installed across Australia, amounting to 1.5 GW of installed capacity. Rooftop PV continues to be a reliable contributor to the ...

The Wooderson project combines 450 MW of solar PV and 3.6 GWh of battery energy storage (BESS) with an eight hour capacity on a DC-coupled setup. It is one of a series of similar ...

Solar and wind are the cheapest forms of energy in the world, and Australia continues to play a big role in that space. But now, the mission is "firming" the complex integration of software, ...

SOFAR delivers all-scenario solar PV and energy storage solutions worldwide. With 12 years in Australia and recognition from the EUPD Top Brand awards, we ...

Australia's current storage capacity is 3GW, this is inclusive of batteries, VPPs and pumped hydro. Current forecasts by AEMO show Australia ...

Australia's solar and energy storage sectors delivered strong performance during the third quarter of 2025, with grid-scale solar generation ...

As Australia's national science agency, CSIRO has turned its decades of expertise in energy to answer this challenge through this Renewable Energy Storage Roadmap. We delivered our first net zero ...

Australia is now the third-largest market worldwide for large-scale battery energy storage by capacity with 14

GW/37 GWh of battery energy ...
