The PowerFilm® Rollable solar panels is the go anywhere, do anything, stand-up to the toughest punishment, lightest, most flexible, waterproof (including saltwater) ...

PowerFilm rollable solar panels are a lightweight, durable, and extremely portable power solution. Fully waterproof, IP67 rated, marine grade connectors.

Despite its widespread use in many applications, poor chemical resistance and roughness have hindered its adoption as a substrate in solar cell technologies. Here, the first-ever perovskite ...

PowerFilm ®; integrated solar panels (thin film on plastic) are developed and ...

Like all PowerFilm solar technology our rollable panels outperform other solar technologies in low-light conditions providing you with the largest charging window over the course of any day (even cloudy ...

This innovation addresses PSC instability to moisture while synergizing photovoltaic and triboelectric mechanisms in a thin-film stack compatible with direct/inverse architectures, paving the ...

PowerFilm ®; flexible solar panels are monolithically integrated which eliminates the need for damage-prone manual connections of individual solar cells. PowerFilm flexible solar panels are constructed ...

Constructed with marine grade connectors to allow use in even the wettest environments. Ruggedized so as to survive in the harshest of conditions, these ...

Thin-film solar panels are an alternative to traditional crystalline silicon (c-Si) panels, offering unique advantages in flexibility, lightweight design, ...
