See more on uspto.gov/patsnap Biaxial flexible photovoltaic tracking bracket - Eureka | Patsnap In these photovoltaic installation scenarios, ordinary rigid beam supports need to adapt to complex environments, which are expensive and difficult to construct.

Abstract Brackets for photovoltaic ("PV") modules are described. In one embodiment, a saddle bracket has a mounting surface to support one or more PV modules over a tube, a gusset ...

United States Patent 6310281. A new, large-area, thin-film, flexible photovoltaic structure is disclosed, as well as a general fabrication procedure, including a preferably roll-to-roll-type, ...

This patent search tool allows you not only to search the PCT database of about 2 million International Applications but also the worldwide patent collections. This search facility features: ...

The photovoltaic assembly support system mainly includes a support body, a lower connecting member and an upper connecting member. Multiple lower connecting members are provided, and are ...

In this review, in terms of flexible PVs, we focus on the materials (substrate and electrode), cell processing techniques, and module fabrication for flexible solar cells beyond silicon.

In the photovoltaic energy harvesting system according to the first aspect of the present invention the flexible fixtures are adapted for providing flexural integrity to the support.

This application belongs to the field of photovoltaic technology, and in particular relates to a flexible photovoltaic bracket and a flexible photovoltaic system.

Photovoltaic flexible bracket patent

As a revolutionary invention in the field of photovoltaic brackets, the flexible photovoltaic bracket can promote rapid development in photovoltaic power generation.
