Between 2025 and 2029, global solar photovoltaic capacity additions are projected to increase yearly and range from some 655 gigawatts in ...

Solar panel shipments to the US decreased in the third quarter, returning to the prior pattern of declining imports after a jump in the second quarter, according to S& P Global Market ...

The US might be making more solar panels, but the rate at which people are installing them has slowed recently.

Photovoltaic (PV) solar accounted for 58% of all new electricity-generating capacity additions through the third quarter of 2025, remaining the dominant form of new electricity-generating ...

The subset of respondents now must report monthly accounts for about 90% of photovoltaic (PV) activity in the United States, based on 2021 data. Data collected on both the ...

Today, China's share in all the manufacturing stages of solar panels (such as polysilicon, ingots, wafers, cells and modules) exceeds 80%. This is more than ...

Each quarter, the National Renewable Energy Laboratory conducts the Quarterly Solar Industry Update, a presentation of technical trends within the ...

98% of PV shipments were mono c-Si technology, with 58% TOPCon. Margins for the leading PV wafer, cell, and module manufacturers continued to decline through Q1 2025, due to ...

Discover the Tier 1 list of solar panel manufacturers for the second quarter of 2025, published by BloombergNEF.

Photovoltaic panel exports in the second quarter

NLR conducts detailed supply chain analysis for specific photovoltaic module technologies. These analyses include production locations, supply chain risk and costs, and material ...
