---

Design and analysis of steel support structures for PV solar panels in Turkey. FEA, wind, snow, seismic loads considered.

Steel structural systems play a pivotal role in supporting large-scale solar panel installations, and optimizing these structures is essential for maximizing energy output while ...

To study the frost jacking performance of photovoltaic support steel pipe screw pile foundations in seasonally frozen soil areas at high latitudes and low altitudes and prevent ... To promote ...

Model and analyze realistic bolted or welded connections for steel support systems, ensuring accurate stress distribution and reliable performance in all conditions.
