Visualize the solar system (including the size of objects, motions, surface features, and distances) with this digital model.

The planets in the inner solar system are relatively close together and mostly composed of rock. The planets in the outer solar system are far apart and ...

Welcome to the 3D Solar System Explorer! I'm Space AI, here to help you learn about space. Try asking me about a specific planet or space phenomenon.

This is the landing site of a lifeboat carrying mostly Earthlings. Between the tents there is a Solar Power Plant, where you can recharge your batteries, and a Repair Device to the south, where you can ...

See your changing planet

Explore our solar system with this interactive 3D simulation. Control planet speeds, zoom, and learn about celestial bodies.

Planet Explorer, powered by advanced AI, offers users an interactive learning experience about our solar system. Dive into detailed planetary facts, generate ...

Every planet and major moon is displayed as a detailed, rotating 3D sphere, orbiting the Sun in real time. This free browser-based solar system simulator allows you to zoom in on Earth, explore ...

Britain is set to power its Antarctic Rothera Research Station with solar energy beamed from space. Large satellites will capture sunlight, convert it into high-frequency radio waves, and send it ...
