Recently, the US Energy Information Administration released a survey of US battery storage capacity as of 2023. In this piece, we'll take a look ...

Batteries became the main energy storage technology in the United States in 2024, surpassing hydro pumped storage. After showing a year-over ...

New data reveals the top five companies by US operating capacity - plus a list of five major projects scheduled to go live this quarter. The US energy ...

Appendix B: Consequence Ranking and Scoring	89
Figures Figure 1. Strategic framework for supply-chain risk assessment and mitigation.	13

U.S. battery storage capacity has been growing since 2021 and could increase by 89% by the end of 2024 if developers bring all of the energy storage ...

Explore the top 25 BESS projects in the US and uncover the key players driving America's energy storage boom.

Even though battery storage capacity is growing fast, in 2024 it was only 2% of the 1,230 GW of utility-scale electricity generating capacity in the United States.

Levelized cost of storage (LCOS)--which includes taxes, financing, and operations and maintenance costs per output kWh--varies significantly by technology. 11 ...

The quarterly ESMO report tracks energy storage developments across multiple battery chemistries, including lithium-ion, sodium-ion, zinc-based, metal-air, and flow batteries. It also ...
