Amsterdam, January 12, 2024 - GIGA Storage is pleased to announce the development of the Green Turtle project, a groundbreaking energy storage project with 600 MW of power and 2,400 MWh of ...

The main goal is to enhance energy security by integrating into EU energy market. The process involves the construction of new interconnections and technical upgrades. This is to be achieved by ...

The thermal energy storage system (TES) installation provides the optimization of energy source, energy security supply, power plant operation and energy production flexibility.

As of 2025, Latvia's energy storage capacity has grown 300% since 2020, with Riga leading this charge. The solar initiative led by SNG Solar marks a transformative step towards reducing carbon emissions ...

Hanersun has announced the commissioning of a 1.15MWh commercial energy storage project in the Latvian capital Riga. The project, ...

As Europe accelerates its transition to renewable energy, the Riga energy storage project has emerged as a pivotal initiative. This large-scale battery storage system is designed to stabilize Latvia's power ...

Summary: The Riga battery energy storage project represents a critical step in advancing renewable energy integration and grid stability in the Baltic region. This article explores the bidding process, ...

This project is part of the Freeport's plan to transform the area into a hub for solar electricity production, energy storage, hydrogen, and alternative fuel production, as well as an industrial and ...

As we approach Q4 2025, Riga's storage capacity is projected to triple, potentially eliminating the need for one natural gas peaker plant entirely. Now that's what we call powering progress!

With features like high energy density, fast charging, and long cycle life, these systems provide a reliable and

Riga Energy Storage Power Production

efficient solution for energy storage, enabling you to achieve greater energy independence.
