-----

This paper proposes a collaborative interactive control strategy for distributed photovoltaic, energy storage, and V2G charging piles in a single low-voltage distribution station ...

As cities like Riga embrace renewable energy solutions, photovoltaic charging piles with integrated energy storage are emerging as a game-changer for urban infrastructure.

This large-scale battery storage system is designed to stabilize Latvia's power grid while supporting the integration of solar and wind energy. Let's dive into why this project matters and what it means for ...

As cities like Riga embrace renewable energy solutions, photovoltaic charging piles with integrated energy storage are emerging as a game-changer for urban infrastructure. This article explores how ...

This deal marks the beginning of a major solar energy project at the port of Riga, which will include the installation of solar panels, the production and storage of renewable electricity, and the development ...

As of 2025, Latvia's energy storage capacity has grown 300% since 2020, with Riga leading this charge. The solar initiative led by SNG Solar marks a transformative step towards reducing carbon emissions ...

Riga's municipal code now mandates 2-hour storage capacity for all new solar installations over 50kW. This forward-thinking regulation created a 170% surge in local storage deployments within 18 months.

The best solution to solve the problem of insufficient power distribution capacity at overcharging sites is to increase energy storage facilities, that is, liquid-cooled energy storage and charging. ...
