The project was aimed at demonstrating the potential for distributing and maintaining renewable energy in rural Africa. Today, SolarAid says it has installed solar photovoltaic (PV) ...

The Golomoti Solar PV project is expected to contribute to this significant impact. The project was an example of human-centred, planet ...

The Salima Solar PV Project was Malawi's first solar Independent Power Producer, and remains the largest IPP in the country. The project is a result of JCM's pioneering activities in the country since ...

This is a 50MW solar power project at Nanjoka in Salima district in the central region of Malawi, 71km away from the Capital City, Lilongwe. The project is planned to be implemented in three phases, ...

The plant is a 20 MWAC solar photovoltaic project coupled with a 10 MWh lithium-ion battery energy storage system at Dedza, approximately 100 km ...

SolarWorks Energy works together with NGOs on programs, health clinics, farmers and schools. Residential customers who need ...

This article explores how solar technology is transforming Malawi's energy landscape, the unique advantages of local manufacturing, and what businesses should consider when sourcing PV solutions.

Exploring innovative solutions, such as installing floating solar panels on Lake Malawi, could mitigate the limitations posed by these extensive restricted areas.
