Welcome to the Global Solar Atlas. Start exploring solar potential by clicking on the map. Select sites, draw rectangles or polygons by clicking the respective map controls. Calculate energy production for ...

We show the location of the projects from our extensive database in the form of place markers on a world map. We used the resources of Google Maps to give access to user-friendly facilities for ...

Mapping the exact locations of current and functioning solar plants is a critical step in addressing these challenges and moving the energy system towards ...

Data and analysis including a list of solar power in every country in the world, countries with the most solar power, and countries that generate the highest ...

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal facilities, as well as country-aggregated distributed (<1 ...

This template gives you an interactive map of power plants around the world. You can explore by energy source -- coal, gas, nuclear, hydro, solar, wind -- and ...

The following is a list of photovoltaic power stations that are larger than 500 megawatts (MW) in current net capacity. Most are individual photovoltaic power stations, but some are groups of co-located plants owned by different independent power producers and with separate transformer connections to the grid. Wiki-Solar reports total global capacity of utility-scale photovoltaic plants to be some 96 GWAC which generated 1....

The Global Power Plant Database is a comprehensive, open source database of power plants around the world. It centralizes power plant data to make it easier ...
