-----

This dataset contains yearly electricity generation, capacity, emissions, import and demand data for over 200 geographies. You can find ...

The U.S. Large-Scale Solar Photovoltaic Database provides the locations and array boundaries of U.S. photovoltaic facilities, with capacity of 1 megawatt or more.

View an interactive map or download geospatial data on solar photovoltaic supply curves.

This powerful visualization tool provides real-time access to detailed information about every major power generation facility in the United States, ...

This map displays information on location, fuel type, electric generation, generating capacity, ownership, and emissions for over 10,000 power plants across the ...

This interactive map examines the viability of three solar technologies in the United States with a high-level annualized economic calculation, with and without ...

The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal facilities, as well as country-aggregated distributed (&lt;1 ...

Explore the latest solar market insights and policy updates in all 50 states and Washington, D.C. All market data is current through Q3 2025. California leads as the top solar state. With over 54 GW of ...

Data and analysis including a list of solar power in every country in the world, countries with the most solar power, and countries that generate the ...
