-----

The Center of Research for Energy and Climate Change (CREEC) serves as the focal point of research, related to energy and environmental technologies, and ...

They provided a broad perspective on solar fuels, emphasizing their role in future energy systems. Speakers also introduced the SUNER-C agenda, ...

Its role in the ITE IPVF is to bring fundamental research to the core competencies of this field and to be at the origin of innovations on the analytical techniques, processes and devices that are relevant for ...

This paper highlights solar energy applications and their role in sustainable development and considers renewable energy's overall employment potential. Thus, it provides insights and ...

This prestigious conference is scheduled to take place from May 18-20, 2026, in Paris, France. AGSREN2026 offers a ...

A French national institute for solar energy INES is a world leader in R& D, expertise and training for advanced photovoltaic solar technologies, their integration into ...

His current research topics are solar energy forecasting, characterization and modeling of outdoor photovoltaics, and local-scale energy management (mainly photovoltaics with storage).

We focus on five low-carbon technologies and on energy efficiency measures. We find that timely R& D investment in these technologies lowers mitigation costs and induces positive ...

We focus our research on Paris, Marseille, and Lyon for the following reasons. First, the cities are the most populous in France, with a significant need for emissions reduction.
