-----

CEMEX, S.A.B. de C.V. ("CEMEX") and Synhelion announced today the successful production of the world's first solar clinker, the key component of cement, a significant step towards ...

Synhelion and Cemex collaborate to pioneer solar-powered cement production. Synhelion's technology, originating from ETH Zurich, uses solar radiation to ...

Switzerland-based Synhelion and Mexican construction materials supplier Cemex have started building a high-concentration solar tower designed ...

In the present work, the authors have attempted to design a solar cement plant for supplying solar energy to the cement industry. A case study was done, which investigated a ...

In the CemSol research project, a team of scientists is developing and demonstrating a solar-heated calcination plant to produce cement. This ...

An innovative and efficient solar power plant solution has been developed for cement factories. On an annual basis, solar PV systems in cement plants may ...

Now Synhelion and CEMEX engineers have built a pilot plant, on the Very High Concentration Solar Tower of IMDEA Energy ...

Synhelion is the first company to sustainably generate process heat beyond 1"500&#176;C with concentrated solar radiation. This makes it possible to ...

Cemex and Synhelion are on their way toward achieving a fully solar-powered cement production with the latest scaling of their technology to industrially-viable levels.
