The Solar Cell Tabber Stringer Machine uses non-contact infrared soldering technology to ensure uniform heating, reducing cell breakage. It is compatible ...

The future of PV manufacturing is here! This clip shows how Hongwei PV's automated string welding is redefining portable solar panel production--cutting inefficiencies while boosting...

The ETS6000 is our fastest infrared stringer machine designed to solder TOPCon, Back contact, HJT, PERC solar cells into strings at a throughput of 6000 cells/hour for half cut cells.

A solar panel stringer machine can help you create a highly efficient photovoltaic (PV) system that maximizes your energy savings. It can be used with various PV systems, including those ...

It is an automated production equipment capable of string welding PV crystalline silicon solar cells, characterized by high production capacity, high precision, and high compatibility.

The photovoltaic string welding machine is mainly composed of a control system, a welding system, a cooling system, and a workbench. Its working principle is mainly to use high temperature to weld ...

Multi-Functional Capabilities: The machine is suitable for welding solar panels of various sizes, including cells with a size of 5-20BB and a thickness of 0.14-0.3mm.

Shingled terminal head welding machine is an automatic equipment to do welding at both heads of solar module string cells with the ribbon.

In the manufacturing process of photovoltaic modules, the series welding of solar cells is a key link in determining the performance and reliability of the modules. High-speed string er ...

Solar photovoltaic panel string welding machine

Solar cell welding machine OCH1500 can be integrated with automatic layup machine to achieve the composing and locating of solar cell strings on tempered glass.
