Globally increasing energy consumption coupled with rising environmental concerns such as greenhouse gas emission is expected to drive the solar power market over the next seven years. ...

Along with our partners at Wood Mackenzie Power & Renewables, SEIA tracks trends and trajectories in the solar industry that demonstrate the diverse and sustained growth of solar across the country.

It examines the current state of solar power and related academic solar energy research in different countries, aiming to provide valuable guidance for researchers, designers, and policymakers ...

Policymakers in some of the world's largest economies are reducing support for solar power generation. Even so, Goldman Sachs Research expects ...

This guide to researching the business of generating and distributing renewable energy focuses on resources related to hydropower, solar, wind, geothermal, and biomass industries as well as the ...

Current, comprehensive coverage of the Solar Power Generation Industry. Includes: industry forecasts, trends, financial information & detailed analysis. Updated 11/24/2025.

Expert industry market research on the Solar Power in the US (2015-2030). Make better business decisions, faster with IBISWorld's industry market research ...

NLR's quarterly solar industry updates provide information on trends within the solar industry. These quarterly updates cover an array of photovoltaic module and system technologies as ...

By technology, the market is segmented into solar photovoltaic (PV) and Concentrated Solar Power (CSP). Solar technology is further categorized into mono-Si, thin film, multi-Si, and others.

In 2024, between 554 GWdc and 602 GWdc of PV were added globally, bringing the cumulative installed

Solar power industry research

capacity to 2.2 TWdc. China continued to dominate the global market, ...
