Amendments to the Energy Act aim to simplify and shorten planning and permitting procedures for solar, wind, and hydroelectric projects of national interest. The changes will ...

Passed stringent solar requirements for new construction. It also subsidizes energy storage to incentivize self-consumption. Provides free consulting to developers on optimally ...

Based on current scientific knowledge, leading Swiss researchers consider that where large amounts of energy need to be stored for the medium to long-term, technologies such as ...

A Swiss consortium has commissioned a ground-mounted, vertical PV-plus-storage plant on an area of around 6,000 m² in the municipality of ...

We find the Swiss plan is viable in July 2050 where surplus daytime solar may be shifted to fill night time deficit using storage. In January 2050, feeble solar supply leaves a supply deficit of 6 ...

Battery storage systems are crucial for the energy transition. Find out how Swissgrid is driving forward their integration into the grid.

The transformation of the Swiss energy system, as outlined in the "Energy Strategy 2050," is a long-term project. The Swiss electorate accepted a revised Federal Energy Law in 2017 in a popular referendum.

As the Alpine glaciers slowly melt away, Switzerland will have the opportunity to build new dams and artificial lakes in the mountains. This will increase energy storage capacity in the Alps,...

This framework aims to address seasonal electricity demand and generation discrepancies, promoting innovative storage solutions, supporting Power-to-X technologies, and ...

Swiss solar energy storage planning scheme

Large-scale photovoltaic systems with an annual production of at least 10 GWh and a high winter share receive a subsidy of max. 60% of the investment costs, provided they are partially commissioned by ...
