Solar PV manufacturing capacity and production by country and region, 2021-2027 - Chart and data by the International Energy Agency.

China produces 86% of the world's solar panels each year, according to Germany's Fraunhofer Institute for Solar Energy Systems. In comparison, ...

This guide compares leading solar panel manufacturers worldwide, examines the resurgence of US manufacturing, and shows how businesses can source panels wholesale.

Today, US solar manufacturing facilities can produce over 51 gigawatts (GW) of solar modules annually --enough capacity to meet nearly all ...

Investment in Illuminate USA facility will create 850 jobs and build one of the largest solar panel production sites in the country. Project addresses immediate and growing U.S. customer ...

First Solar will build a fifth US module plant with 3.7 GW of annual output, lifting its total domestic capacity to more than 14 GW by 2026 and ...

Tongwei Solar completed China's first gigawatt-scale HJT production line in 2021 and went on to complete the development of the industry's first 210 double-sided microcrystal module in ...

First Solar (Nasdaq: FSLR) announced in its Q3 2025 earnings report that it will open a new 3.7 GW annual capacity solar module finishing line in the ...

The first solar panels rolled off the line Thursday as Illuminate USA began production at its 1.1-million-square-foot factory in Pataskala, which will be ...

The largest photovoltaic panel production line in the country

This map provides information about all of the solar photovoltaic (PV) manufacturing facilities in the United States and how they contribute to the solar supply chain.
