The clamp allows for direct PV module mounting to purlins and other structural members. The patent pending Pre-assembled clamps eliminate handling small parts on the job site and provide for a faster ...

The support structures are the elements that allow the fixing of the modules on the roofs where the photovoltaic installation must be housed, constituting a main element of the solution.

These enable the PV mounting system to be fixed in the steel or wooden substructure. The matching calottes in various sizes and colours are also included in the scope of delivery.

Free BIM and CAD models for Revit, AutoCAD and Archicad software. Optimise the efficiency of your workflow and download organised and up to date product libraries from ProdLib.

The aim was to develop a non-welding connection detail for improved durability. For the connection details, a total of 10 plinths with base plates and supporting plate units were developed. ...

Understand the key components in a solar roof mounting system -- hooks, L-feet, rails, clamps, and grounding accessories. ...

Balcony Solar Mounting System is a Solar Mounting System product installed on balcony railings, which can easily realize the construction of photovoltaic power plants on the balcony. The system is all ...

For larger penetrations, a roof curb (which is an elevated platform) may be designed and installed close to the perimeter of the opening to support the penetration or rooftop equipment.

F24S25/40 -- Arrangement of stationary mountings or supports for solar heat collector modules using plate-like mounting elements, e.g. profiled or corrugated plates; Plate-like module frames

The role of photovoltaic support rail penetration plate

We design and produce photovoltaic structures with ground fixing, facades, rooftops, shades and floating PV (standing water lakes). Photovoltaic structures ...
