-----

We are Australia's longest-running renewable energy consultancy. Employee-owned and led, we offer clear, verifiable and independent advice on your sustainability and decarbonisation goals. With ...

Discover how Electro-Thermal Energy Storage (ETES) can boost renewable reliability, reduce emissions, and future-proof Australia's energy system.

MGA Thermal is a revolutionary Australian clean energy company with a breakthrough form of energy storage. MGA Blocks store and deliver thermal energy while remaining outwardly solid.

We are developing next-generation energy storage technologies that use thermal energy, compressed air, hydrogen, batteries and ceramics to ...

The high energy density and long duration of MGA Thermal technology is ideal for storing renewable energy at utility-scale. The wide temperature range allows for ...

Thermal Dawn is building a next-generation thermal battery for homes -- storing heating, cooling, and hot water energy to cut power bills, reduce emissions, and boost solar self-consumption.

With ambitious climate targets - including 100% renewable electricity by 2025 - the Australian Capital Territory (ACT) relies on cutting-edge storage systems to stabilize its grid. Let's explore how these ...

Our SiBox &#174; product is a scalable - and proven - thermal energy storage system (TESS), designed to be retrofitted to heavy industry processes to provide clean ...

As Canberra accelerates its renewable transition, intelligent temperature control isn't just an option - it's the cornerstone of safe, efficient energy storage systems.
