To reduce the physical damage caused by a lightning strike to a structure, a Lightning Protection System (LPS) would need to be installed, details of which are given in BS EN 62305-3.

Constellation will create revolutionary smart substations which free up capacity for renewable energy to facilitate Net Zero emissions.

Featuring lithium-ion batteries, integrated thermal management, and smart BMS technology, these cabinets are perfect for grid-tied, off-grid, and microgrid applications. Explore reliable, and IEC ...

Here you can learn about how these standards are developed and where they are available. We develop and maintain the engineering recommendations, reports and guidance used by the network ...

Complete portfolio of automation, protection, control and monitoring solutions for reliable, efficient and sustainable substation and power grid operations

The designer of the substation LPS will utilise the rolling sphere method to optimise the locations and configurations of lightning masts and shield wires in order to ...

This page organizes system-level EMI, surge and lightning protection for substation control cabinets, ring main units, feeder automation terminals and smart LV panels.

By ensuring compliance with the British standard for lightning protection, you can significantly reduce the risk of lightning damage, safeguard your electronic ...

Utilising industry-leading solutions, we stock a comprehensive range of MV switchgear and LV cabinets that can be close-coupled to transformers or free-standing. Our options include a packaged solution ...

UK Substation Intelligent Energy Storage Cabinet with Lightning Protection

As a specialist UK manufacturer of large walk-in enclosures including GRP Substation housings and steel transformer enclosures, we offer a wide range of bespoke and standard size solutions for ...
