This ambitious project is designed to strengthen grid stability and accelerate the country's transition to renewable energy. The battery storage ...

Issued under Section 16 of the Electricity Act, the directive marks the start of Phase I in a national programme to deploy more than 1GW of solar-plus-storage capacity.

Uganda's government has approved the development of a 100-MWp solar power plant with 250 MWh of battery energy storage to be delivered by ...

The Government of Uganda has officially issued a Gazetted Policy Direction authorizing the development of a 100 MW solar photovoltaic power plant integrated with 250 MWh of battery ...

The 100 MWp solar photovoltaic (PV) power plant integrated with a 250 MWh battery energy storage system (BESS) project will be delivered by ...

Phase I of the Kapeeka project is expected to serve as a foundation for future renewable energy expansion, with Uganda targeting more than 1 GW of solar and storage capacity nationwide. ...

The Government of Uganda has authorised engineering, procurement, and construction (EPC) contractor Energy America to build a 100MWp solar PV plant, integrated with a 250MWh ...

Uganda's latest push in energy storage isn't just about batteries bigger than your fridge; it's about keeping lights on during Netflix binge nights and powering safari lodges ...

The facility, to be built in Kapeeka, marks the first phase of Uganda's ambitious plan to deploy over 1 gigawatt (GW) of solar and battery storage capacity nationwide.
