Virtual power plants (VPPs) can play a key role in providing reliable and affordable power on demand in seconds.

At Schneider Electric, we actively collaborate with NVIDIA, and the 800 VDC sidecar is the first solution on the way to 1 MW IT racks.

One of the most promising is expanded deployment of VPPs. Three characteristics make VPPs uniquely well-suited to support rapidly growing large ...

With advanced cluster control, each battery rack charges and discharges independently, boosting overall discharge capacity by 8%. It also reduces circulating currents, improving safety and system ...

Virtual power plants (VPPs) are every bit as real as conventional generation resources. Essentially collections of distributed battery storage units ...

StackRack's SR-VPP solution involves transforming each sub-station and its associated 1,500 homes into a virtual power plant (VPP) by installing battery storage systems at these locations.

Compare 2025's top power distribution units for server racks. Discover features, scalability, energy efficiency, and reliability to optimize your IT ...

With the new DeltaV Virtualization Hardware for Hyperconverged Infrastructure you can rest assured that your control system is fully tested and supported to meet your process control needs. DeltaV ...
