---

Called Project Nexus, the work began in October 2022 with funding of \$20 million from the state's coffers.

A novel solar power project just went online in California's Central Valley, with panels that span across canals in the vast agricultural region. The ...

UC Merced and Solar AquaGrid wanted to assess the feasibility of placing solar panels over the state's longstanding California Water Project, a 4,000-mile canal system providing water to ...

In February, TID announced Project Nexus, a pilot project to install 5 megawatts of solar panel canopies over our existing irrigation canals - the first project of its kind in the nation.

America's first solar-canal project started producing power in October 2024 for the Pima and Maricopa tribes, known together as the Gila ...

Project Nexus, the first solar panels over irrigation canals in the US, is now online in California, and the project will now be expanded.

The \$20 million experiment, dubbed Project Nexus, is funded by the state of California and will assess whether solar panel canopies erected over exposed irrigation canal systems can significantly reduce ...

This is the case with the S&#227;o Francisco River Integration Project (PISF) in Brazil. This paper proposes using photovoltaic (PV) panels to cover the channels of the PISF to reduce ...

A novel solar power project just went online in California's Central Valley, with panels that span across canals in the vast agricultural region. The 1.6 -megawatt installation, called Project ...

A novel project in California demonstrates the many overlapping benefits of solar canals when land is scarce
